**LEGAL DESCRIPTION OF PROPERTY ON WHICH WATER IS TO BE USED**

Area served by Public Utility District No. 1 of Stevens County. The place of use of this water right shall be consistent with the service area map contained within the most recently approved water system plan (including amendments).

SUPERSEDING PERMIT

DESCRIPTION OF PROPOSED WORKS

Twelve (12) wells, pumps, distribution system, reservoirs.

DEVELOPMENT SCHEDULE

BEGIN PROJECT BY THIS DATE:

Started

COMPLETE PROJECT BY THIS DATE:

August 1, 2008

WATER PUT TO FULL USE BY THIS DATE:

August 1, 2014

PROVISIONS

The total amount of water authorized for withdrawal under existing rights for the Suncrest/Long Lake (Stonelodge) Water System is limited to 7,942 gallons per minute, 3,037.01 acre feet per year, continuously, for municipal supply.

The place of use of this water right shall be consistent with the service area map contained within the most recently approved water system plan (including amendments).

An approved measuring device shall be installed and maintained for each of the sources identified herein in accordance with the rule "Requirements for Measuring and Reporting Water Use", Chapter 173-173 WAC. Water use data shall be recorded weekly and maintained by the property owner for a minimum of five years, and shall be promptly submitted to Ecology upon request.

The rule above describes the requirements for data accuracy, device installation and operation, and information reporting. It also allows a water user to petition Ecology for modifications to some of the requirements. Installation, operation and maintenance requirements are enclosed as a document entitled "Water Measurement Device Installation and Operation Requirements".

Department of Ecology personnel, upon presentation of proper credentials, shall have access at reasonable times, to the records of water use that are kept to meet the above conditions, and to inspect at reasonable times any measuring device used to meet the above conditions.

Any future pump test data for the new well shall be submitted as it is obtained to the Department of Ecology.

The amount of water granted is a maximum limit that shall not be exceeded and the water user shall be entitled only to that amount of water within the specified limit that is beneficially used and required.

This authorization to make use of public waters of the State is subject to existing rights, including any existing rights held by the United States for the benefit of Indians under treaty or otherwise.

Nothing in this authorization shall be construed as satisfying other applicable federal, state, or local statutes, ordinances, or regulations.

All water wells constructed within the State shall meet the minimum standards for construction and maintenance as provided under RCW 18.104 (Washington Water Well Construction Act of 1971) and Chapter 173-160 WAC (Minimum Standards for Construction and Maintenance of Water Wells).

Use of water under this authorization shall be contingent upon the water right holder's utilization of up to date water conservation practices and maintenance of efficient water delivery systems consistent with established regulation requirements and facility capabilities.

The installation of an access port, described in Ground Water Bulletin #1, shall be required prior to issuance of a final certificate of water right. In addition, an airline and pressure gauge shall be installed and maintained in operating condition. The pressure gauge shall be equipped with a standard tire valve and placed in an accessible location. The airline shall extend from land surface to the top of the pump bowls and the total airline length shall be reported to the Department of Ecology upon completion of the pump system.

A well log of the completed well shall be submitted by the driller to the Department of Ecology within thirty (30) days of completion of this well. This well log shall be complete and all information concerning the static water level in the completed well in addition to any pump test data shall be submitted as it is obtained.

A certificate of water right will not be issued until a final examination is made.

This superseding permit shall be subject to cancellation should the permittee fail to comply with the above development schedule and/or to give notice to the Department of Ecology on forms provided by that Department documenting such compliance.

Given under my hand and the seal of this office at Spokane, Washington,

this 29th day of June, 2004.

Mr. Richard Price  
PUD No. 1 of Stevens County  
PO Box 592  
Loon Lake, WA 99148-0592

Dear Mr. Price:

Re: Ground Water Permit No. G3-29322

Enclosed please find the above-referenced permit, which supersedes the original permit issued November 10, 1994, as requested by the application to change the points of withdrawal and add five (5) points of withdrawal.

We are also enclosing a new instruction sheet together with a form for filing Notice of Completion of Construction after the project has been completed. Please note that the form is due in this office on or before August 1, 2008 in order to avoid cancellation proceedings.

Please read the instruction sheet as well as both sides of your permit to insure that the changes have been properly included.

Sincerely,

Victoria A. Leuba  
Decision Unit Supervisor  
Water Resources Program
